

# PROJECT DATA SHEET

**Client:** Tai Chong Cheang Steamship Co (HK) Ltd

**Project Title:** Inspection and Supervision of Repair Works on KHK Vision

**Completion:** December 2020

**Location:** Singapore

**Services:** Ship Survey

KHK Vision, a Very Large Crude Carrier (VLCC), encountered heavy weather during a voyage and sustained damage to its forward bulwark on the starboard side. The repairs were carried out in Singapore.

Paaras Marine Solutions was engaged by the Shipowner to carry out inspection and supervision of the repair works on its behalf. The scope of services included:

- Conducting joint inspections with the ship-repair contractor and Classification Society surveyor to determine the scope and extent of the repair works.
- Monitoring and supervising the repair works to ensure that they are carried out in accordance with appropriate shipbuilding standards, Classification Society rules and international best practices.
- Recommending and overseeing the required Non-Destructive Testing (NDT) to assess the quality of the repair works.
- Preparing daily inspection reports to keep the Shipowner advised of the progress of the repair works and any changes to the scope and extent.
